

Panasonic recommends Windows® 7.

CLEANING AND DISINFECTING THE PANASONIC TOUGHBOOK H2.

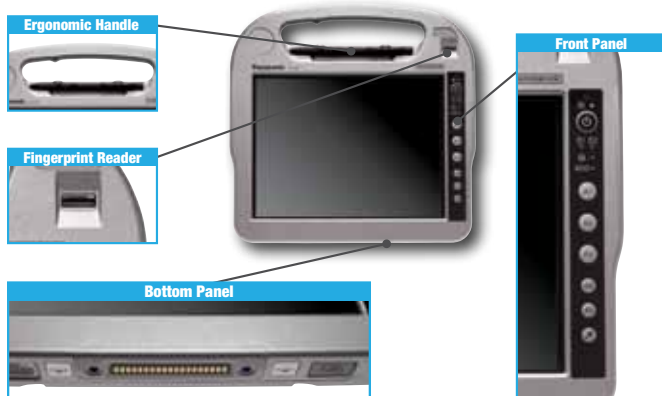

In order to reduce or eliminate the possible spread of bacteria and viruses, all healthcare equipment must be kept clean and disinfected. The same is true of point-of-care mobile computing devices. That's why we built the Panasonic Toughbook® H2. With its fanless, sealed design and smooth surface, the Toughbook H2 helps provide significant infection control.

Panasonic has tested a number of common disinfectant solutions for usability on the Toughbook H2, going above and beyond typical testing procedures to simulate worst-case scenarios. It's all part of the Panasonic commitment to provide you with the most comprehensive product support for the durable, reliable Toughbook H2.

RECOMMENDED "WIPE" FORMS OF DISINFECTANTS

Panasonic recommends disinfectant wipes to avoid prolonged exposure to chemicals that can cause oxidation and paint discoloration, and break down the rubber that seals the tablet. If the wipe form of these disinfectants is used and the surface is dried soon after application, the computer will be protected for years to come.

SEALED DESIGN

APPLICATION AND TEST PROCEDURES

To keep your Toughbook H2 running for as long as you do, Panasonic rigorously tested the device to see how many times it could be disinfected. The test procedure was to wipe each area on the device with the liquid solution with a pressure of 1 kg/cm² for 10,000 times.

RECOMMENDED DISINFECTANTS

- Sani-Cloth® Plus Germicidal Disposal Cloth
- Alcohol Prep Swabs
- CaviWipes™
- Total Solutions™ Disinfectant Wipes
- Clorox® Germicidal Wipes

CONCLUSION

With normal use, none of the wipe disinfectants listed above should damage a Toughbook H2; however, please be sure to dry the surface soon after the solution is applied. Otherwise, the PC surface quality may change. Although these disinfectants are tested for our products, Panasonic does not endorse or advertise a particular brand of disinfectant and cannot warrant their effectiveness.

SANITIZATION REMINDER SYSTEM

Because cleanliness is paramount, the Toughbook H2 comes equipped with a user-controlled sanitization reminder system to increase the likelihood of cleaning. The system maintains a record of device cleaning for infection control management and auditing purposes. It even helps while cleaning to show if any parts of the screen have been missed.
